The Siemens Connexx 6.4, later renamed EIT, is a system of computer terminals and a paper tape reader, intended for digital control of equipment. It also supported the Siemens SIA standards, based on the X12 and SIA time-series communications protocols. Siemens Connexx 6.4 Download Siemens Connexx 6.4 Windows-1301420-2112113 When the first connexx 6.4 was released in 1979 it was a bulky and expensive system weighing about twenty five kilograms. Using its full capabilities required many terminals. By the time the Siemens Connexx 7, 8, 9, and 10 were released, the system had grown smaller and more user friendly, but all of them were still fairly large and expensive, weighing about a quarter tonne. The Connexx system was also known as the Connexx Format (CF), Control Format (CxF), and the Control Format II (CxF2). One of the most famous uses of the Connexx is the end-to-end management of nuclear power plants. The nuclear industry, needing to manage all of the equipment involved in a nuclear power plant, was the first to use it. Siemens has since introduced a series of new models of Connexx which are included in the SIEMENS PF Series. The Connexx 6.4 uses the PIR communications protocol. It was introduced in 1979 and continued to be produced until 1987. Siemens Connexx 6.4 Work The Siemens Connexx 6.4 is a motor control computer designed for Siemens SIA systems.
